

Testimonials from NaturCare® Users

Yale New Haven Hospital -
Yale New Haven Health
New Haven, CT; Ronelle - RN

We deal with many different odors stemming from really unsavory sources. I can honestly say NaturCare works, and patients & staff really like it. It's a cheap price to pay for everyone's happiness!

Hackensack Meridian Hospital
Hackensack, NJ; Courtney - RN
Patient Care/Bariatrics

I found that patients with bowel preps, GI upset, and ostomies found NaturCare to be positive and loved using it. A lot of times, patients are sensitive about the scents emitted related to their condition, so they appreciate spraying it in their room or using it as part of their cleaning.

NYC Health + Hospitals
New York City, NY; Noreen, CNO

We used Lavender NaturCare in the respite center and as part of the spa cart we sent out to nurses during the COVID-19 pandemic. They were overwhelmed. Thank you!

Beverly Hospital - Lahey Health
Beverly, MA; Julie - RN

We are very happy to have these wonderful products in our hospital! 2 oz. NaturCare Orange/Grapefruit is used per patient/room. NC Super Odor Eliminator, 16 oz., is used by housekeeping for general unit hallway and nurse's station refreshing/deodorizing.

Unity Hospital -
Rochester
Regional
Rochester, NY;
Jennifer - CNO

Staff continues to use the products and seem to like them. I have not heard otherwise!

Fairview
Hospital -
Berkshire MS
Great Barrington,
MA; Gerry -
Director Infection
Control

Clinical staff love the products!

The Valley Hospital
Ridgewood, NJ; Pat - WOCN

We are in the process of educating staff on the many uses for NaturCare, and it has been received well by staff and patients. I gave a bottle to an ostomy patient yesterday who loved it and was anxious to be able to buy more NaturCare for use after leaving the hospital.

Hasbro Children's Hospital - LifeSpan Providence, RI; Nancy - RN

NaturCare has been great. We have had positive feedback from the families and staff!! We use the 2 oz. size for patient care and 16 oz. bottles for our diaper room odors.

Quality of Life (Ostomy)
Organization *Velma - RNWOCN*

As an RNWOCN, I've seen my share of fragrance driven odor eliminators but not all work effectively - they just provide a fragrance but the real odor remains. I find this to be untrue with NaturCare: it provides odor elimination and a nice essential oil aroma. I think I like the lemon best - but they all work very well, effectively, and pleasantly. As an ostomy patient and nurse, I am always looking for and willing to test products such as those by Nature Plus.

Byron Health Care Center
Fort Wayne, Indiana;
Karen - Nursing Supervisor

Over a two month period of time, we used NaturCare on & around 10 patients who were terminally ill. We did not spray it directly on wounds, but we sprayed it on intact skin on legs and private areas soiled from urine or feces & on secondary bandages. We found it to be very effective for wound and incontinence odors. It also got rid of odors on their soiled bed clothing and the air, which greatly improved the room situation.

Ipswich Hospital Suffolk, England;

Glynis - Tissue Viability Nurse Specialist/Central Treatment

A group of our patients with mixed open wounds had a noticeable odor emitting from the wounds that was unpleasant to patients themselves. NaturCare was applied onto the secondary dressing and we found a good level of efficacy in controlling the odors. It was easily applied and reapplied as needed and none of the patients expressed discomfort.

Massachusetts Health & Hospital Association

Lorraine - Senior Director, Clinical Affairs

At our healing meeting, the committee loved the NaturCare natural deodorizers! We replaced all our current air fresheners at our administrative offices. Two of our staff also got stains out of their clothes before having to go to a meeting!

Mother of Behavioral Health Patient
Louise - Bridgeport, CT

Life with a son who has chemical imbalance is challenging every day and emotionally charged. He was readmitted to the psychiatric unit, and I was distraught to be there again - but knew we needed help. Within a couple minutes, a nurse, smiling broadly, came in spraying NaturCare! Between her happy demeanor and the wonderful "gift for our noses"- it changed the whole mood of our experience!

Colostomy Patient
Ron - Shelton CT

Life with a colostomy has been difficult - health, time, and odor-wise. Leakage, especially at inconvenient times, is disheartening. I am so glad that I found NaturCare early on because I can deodorize my soiled support appliance, fabric barrier attachment, and skin quickly & discreetly without having to do a full wash/change. I have also used it on the tissues & used bag I discard by my bed.
