

NK-HEALTHPROTECT™

POP-UP ICU SOLUTION

The pandemic of COVID-19 has generated concern that critically ill patients may overwhelm existing ICU bed availability.¹ The Society of Critical Care Medicine estimates that the health needs created by the coronavirus pandemic will far exceed the capacity of U.S. hospitals.² Whether you are converting a low-acuity room to use as ICU overflow or expanding your critical care areas, our NK-HealthProtect Pop-Up ICU Solution, which includes bedside monitors and a central station, is ready to support you.

Designed to meet your needs during this pandemic, the NK-HealthProtect Pop-Up ICU Solution is a 16-bed ICU that can be deployed in less than 40 minutes and includes all equipment and material you need for a fully functional solution.* Our kits also include online training modules and remote support to reduce the need for onsite resources for training and installation. With the NK-HealthProtect Pop-Up ICU Solution, hospitals and health systems can transmit timely and critical information necessary in times of crisis.³

Each ICU solution will contain the following:

- Life Scope® Central Station CNS-6801, 16-patient central station with strip recorder and UPS
- 16 Life Scope BSM-6000 Series bedside monitors equipped with battery
- 16 Life Scope Transport (BSM-1700) monitors
- Network and installation material
- Accessories and consumables
- Quick reference guides, clinical reference guides and installation instructions
- Online clinical modules and training

Option to add additional sensors and accessories, including end tidal CO₂.

*Estimated based on a 3-person team. Approximate setup time is 5 minutes per monitor per person and 20 minutes per CNS.

NK-HEALTHPROTECT™ POP-UP ICU SOLUTION

Life Scope Central Station CNS-6801
Single Monitor

Financial Options Available

Option 1

Capital Purchase

\$182,000

**16-Bed
Pop-Up ICU Solution**
