

PIVOT: WHAT'S IN A NAME?

P

PROTEIN

Contains very high protein to support protein synthesis and tissue repair, and arginine to support wound healing^{1,2}

I

IMMUNE SUPPORT

From Arginine, Glutamine and Omega-3 Fatty Acids^{3,4}

V

VOLUME

Calorically dense (1.5kcal/mL) for fluid restricted patients

O

OMEGA-3 FATTY ACIDS

To help modulate inflammation and support immune function^{5,7}

T

TOLERANCE

Advanced blend of hydrolyzed protein, structured lipids, and prebiotics (NutraFlora[®] scFOS[®]) to support absorption and tolerance

Designed to promote GI tolerance

and immune support

Peptide-based

MCT/fish oil structured lipids

Short-Chain Fructooligosaccharides (scFOS[®])

Supplemental Arginine & Inherent Glutamine

EPA & DHA from Fish Oil
